Web & Software Development:
Front End:
- React, Bootstrap, Tailwind CSS

Back End:
- Laravel, PHP
- FastAPI, Python (learning)

Deployment:
- Familiarity with Cloud Deployment (AWS)
- NGiNX, Vercel

SOLO PROJECTS

SingleEvent Dynamic Website in Laravel 12

Built a dynamic event management system using Laravel-12 that can be fully customized through the admin panel, featuring user authentication, event creation, ticket management, and admin-level controls. Integrated Bootstrap for responsive UI and leveraged Eloquent ORM for seamless database operations.

Mow&Shine Cleaning Services *(www.mownshine.com)*

Designed, developed, and deployed a fully responsive, lightweight website for a lawn care and cleaning services company using HTML, CSS, JavaScript, and WordPress. Showcases services, pricing, and customer testimonials, and is optimized for SEO and fast loading on both mobile and desktop devices.

EDUCATION

Bachelor of Science in Computer Science & Engineering   **Sep 2019 - Sep 2023**
North South University

PROFESSIONAL CERTIFICATES

- CCNA
- CompTIA A+
- CompTIA Security+
- CompTIA Network+
